## SPONSORSHIP BROCHURE

EVENT IN COLLABORATION WITH

# INVITATION TO PARTICIPATE IN SIGN 2024

Join us at the **SIGN 2024 Conference** for an exciting and collaborative exploration of the latest advances in neurointerventions!

**The SIGN 2024 Conference** centers on unmet need for effective delivery of therapeutic agents to the brain. It will emphasize the value of advanced imaging to guide neurointerventions and to monitor drug pharmacokinetics from the moment of delivery through initial biodistribution and subsequent clearance from the central nervous system. Head-to-head presentation of various neurointerventions will be essential for understanding of their strengths and weaknesses.

**This meeting is expected to provide guidance and a perspective for the years to come.**

**Neurointerventions covered during the conference will include:** Focused Ultrasound (FUS), Local / CSF mediated routes, Osmotic blood brain barrier opening (OBBBO), Convection - enhanced delivery (CED), Artificial intelligence, Magnetic particle imaging (MPI), Endovascular drug delivery Stem Cells

The meeting will provide the perspective about the state of art developments across all disciplines contributing to image-guided neurointerventions to identify opportunities and challenges, and discuss common goals linking the extensive bandwidth of expertise. The ultimate goal is to define a roadmap for image-guided precision medicine for neurological disorders for the forthcoming years.

**On behalf of the Organising Committee of SIGN 2024, it is with great pleasure we invite you to partner with us for this significant conference and be a part of the Scientific Programme.**
